S1: 7:30am – 8:15am (Morning session includes breakfast and beverages)

S2: 4:00pm – 4:30pm (Evening session includes dinner and beverages)

Including welcome drinks.

Guests will also have access to familiarise with the trade show and tabletops.

KEYNOTE PRESENTATIONS

S1: 8:15am – 10:15am

S2: 4:30pm – 6:30pm

Welcome from Anthony Achermann (State Manager – NSW, APS Industrial)

KEYNOTE 1: A WORLD FIRST IN MANUFACTURING & VALUE ADD INNOVATION

With a firm eye on delivery times and effectively servicing local industry APS is proud to announce the opening of a dedicated local manufacturing and value add services centre in Adelaide. In this informative presentation you'll hear from David Read, Products Director at APS Industrial, as he showcases the never-before-seen local capability, that industry can now expect out of the world's first fully certified Siemens customisation facility outside of Germany.

KEYNOTE 2: REDUCING DESIGN, MANUFACTURING AND ASSEMBLY TIMES THROUGH DIGITALISATION

The digitalisation and automation of industrial control and switchgear design and manufacturing creates consistency throughout all process and systems – ultimately increasing quality whilst significantly reducing manufacturing and assembly time. Rittal and EPLAN help industrial companies to add value to their processes and make them faster, more economical and more precise.

KEYNOTE 3: BEYOND 1%

The world has entered a perfect storm. Challenging net zero targets have been set, energy prices have risen rapidly, and labour and skills shortages have grown. How can digitalisation help Australia punch above its weight in the global net zero race? The rapid deployment of digitalisation technologies and skills into our industrial, energy and infrastructure sectors is critical to support climate goals and to make businesses more competitive. It is also essential to allow Australia to take a leading role in reducing global greenhouse gas emissions: beyond the 1% of emissions we are responsible for today.

KEYNOTE 4: INDUSTRIAL PRODUCTS SPEED DATE

In 2023, APS Industrial along with our manufacturing partners have already made some game changing product releases that have transformed the way local business can add value to their projects. And with half the year still ahead of us, there is plenty more to expect over the coming months. Hear from Anthony Achermann, NSW State Manager, as he delivers a showcase of these including Weidmüller EV Chargers, a complete family of 61439 compliant solutions, the latest from Siemens Factory Automation and more!

TRADE SHOW

S1: 10:15am – 11:30am

S2: 6:30pm – 8:00pm
